DETAILED ACTION

Response to Arguments

Applicant's arguments, see the amendment, filed 1/10/2005, with respect to Claims 1 and 7 have been fully considered and are persuasive. Therefore, the rejection of Claims 1 and 4-13 have been withdrawn due to the added limitations to the claims.

Applicant's arguments filed 1/10/2005 with regard to Claim 14 have been fully considered but they are not persuasive. The applicant has given no clear arguments pertaining to claim 14. Therefore, the examiner upholds the rejection as being anticipated by USPN 4,680,638 Childs.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1: Claim 14 is rejected under 35 U.S.C. 102(b) as being anticipated by USPN 4,680,638 Childs.

2: In regards to Claim 14, Childs teaches on Column 4, Lines 14-29 A method of scanning frames of cinematographic film to generate digital values of pixels constituting images on the film frames; (Column 2, lines 14-16), in which pixels corresponding to a scratch defect on a film frame are identified and the values of such pixels are adjusted to compensate for the defect, (Column 2, Lines 35-48). Childs teaches if the width of the scratch exceeds a predetermined number of pixels, (This is viewed by the examiner as a scratch that has any width) at least one

Art Unit: 2612

column of pixels from within the scratch defect is removed, image pixels outside the scratch are moved in to compensate for the removed pixels; Column 3, Lines 43-49. Childs teaches on Column 6, Lines 1-12 pixels within the scratch defect are corrected by using values interpolated from pixels on either side of the scratch.

Allowable Subject Matter

3: Claims 1 and 4-13 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The prior art does not teach the method of generating digital values in the visible range and identifying those pixels with values beyond a maximum which is close to pure white or a minimum which is close to pure black. Furthermore, the prior art does not teach identifying a pixel that corresponds to a scratch and ONLY comparing the pixels located in a column generally aligned with the identified pixel.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2612

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
